

# keep your product cost on target

## cost engineering for electronics

### About us

ecs is the leading expert consultancy for product cost engineering in electronics. Our focus is automotive electronics where various automotive OEMs and many of the world's largest suppliers belong to our customer base. Moreover, market leaders from the industrial and consumer electronics industry as well as large EMS (Electronics Manufacturing Service providers) are among our clients.

Our clients trust in our large knowledge base, deep professional expertise and an uncompromising ambition for quality. The scope of our services starts with target costing, the definition of optimal target prices as well as benchmarking of competitor products as well as product cost analysis and cost optimisation in series products. We also offer in-house trainings for electronics purchasing and design to cost.

to meet the needs of our dynamic growth, we are looking for a

## Consultant Cost Engineering (m/f)

### Your responsibilities

- ✓ Realize projects in various industries: automotive, industrial, consumer.
- ✓ Prepare process and product cost analyses.
- ✓ Product teardown (e.g. cutting edge technologies such as driver assistance and autonomous driving systems, e-mobility, connectivity).
- ✓ Research new technologies and processes.
- ✓ Give presentations and trainings, moderate workshops
- ✓ Analyse business cases, e.g. Make-or-Buy, Market Entry or Target Costing.

### Your contribution

- ✓ You are amongst the top students in engineering or a business study programme with technical background.
- ✓ You are fascinated by technology in a business context, ideally in relation to electronics.
- ✓ You are able to analyse and structure abstract and complex issues (e.g. modelling processes)
- ✓ Your drive and initiative enables you to explore new topics and technologies.

### As a dynamic team in a horizontal organisation we can offer you

- ✓ Working in exciting projects with interesting and varied responsibilities.
- ✓ A fascinating setting in the automotive field with multinational clients and innovative products.
- ✓ The opportunity to grow and acquire well-founded professional expertise.
- ✓ An open, fun working environment and the possibility to learn from experienced professionals.
